PATENT COOPERATION TREATY

From the

INTERNATIONAL SEARCHING AUTHORITY To: WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY EINGEGANGEN / RECEIVED (PCT Rule 43bis.1) 2 9. Nov. 2004 Date of mailing MÜNCHEN (day/month/year) see form PCT/ISA/210 (second sheet) FRIST Applicant's or agent's file reference FOR FURTHER ACTION see form PCT/ISA/220 See paragraph 2 below International application No. International filing date (day/month/year) Priority date (day/month/year) PCT/B2004/000349 11.02.2004 International Patent Classification (IPC) or both national classification and IPC H04Q7/38, H04L12/56 Applicant NOKIA CORPORATION 1. This opinion contains indications relating to the following items: Box No I Basis of the opinion

_	DOX 110. 1	basis of the opinion
\boxtimes	Box No. II	Priority
	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
	Box No. IV	Lack of unity of invention
Ø	Box No. V	Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
	Box No. VI	Certain documents cited

☐ Box No. VII Certain defects in the international application

☐ Box No. VIII Certain observations on the international application

FURTHER ACTION

If a demand for international preliminary examination is made, this opinion will usually be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA"). However, this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notifed the International Bureau under Rule 66.1 bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of three months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220. .:

For further details, see notes to Form PCT/ISA/220.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/IB2004/000349

	Box I	No. I	Basis of the opinion
1.	With the la	regard inguag	to the language, this opinion has been established on the basis of the international application in le in which it was field, unless otherwise indicated under this item.
	Ic	angua	ninion has been established on the basis of a translation from the original language into the following ge , which is the language of a translation furnished for the purposes of international search Rules 12.3 and 23.1(b)).
2.	With r	egard sary to	to any nucleotide and/or amino acid sequence disclosed in the international application and o the claimed invention, this opinion has been established on the basis of:
	a. type	e of m	aterial:
		a se	quence listing
		table	e(s) related to the sequence listing
	b. forn	nat of	material:
		in w	ritten format
		in co	mputer readable form
	c. time	of fili	ng/furnishing:
		conta	ained in the international application as filed.
		filed	together with the international application in computer readable form.
			shed subsequently to this Authority for the purposes of search.
3. [ha co	additions been been been been been additional additiona	on, in the case that more than one version or copy of a sequence listing and/or table relating thereto in filed or furnished, the required statements that the information in the subsequent or additional identical to that in the application as filed or does not go beyond the application as filed, as ate, were furnished.
l. /	Additio	nal co	mments:

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/IB2004/000349

	Box No. I	l Priority					
1.	. ⊠ The f	ollowing document	has not be	en furnishe	ed:		
	⋈	copy of the earli	er applicatio	n whose p	riority has been claimed (Rule 43bis.1 and 66.7(a)).		
		translation of the	e earlier app	lication wh	ose priority has been claimed (Rule 43bis.1 and 66.7(b)).		
	Cons- never	equently it has not theless been estat	been possil dished on th	ole to cons ne assump	ider the validity of the priority claim. This opinion has tion that the relevant date is the claimed priority date.		
2.	This opinion has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rules 43 <i>bis</i> .1 and 64.1). Thus for the purposes of this opinion, the international filing date indicated above is considered to be the relevant date.						
3.	Additional	observations, if ne	cessary:	i			
	Box No. V						
	industrial		tement und	ler Rule 43 explanatio	Bbis.1(a)(i) with regard to novelty, inventive step or ns supporting such statement

see separate sheet

- 1. Reference is made to the following document:
 - D1: WO 02/05453 A (SEROK AMIR; ZIMMERMAN OFER (IL); ENSEMBLE COMMUNICATIONS INC (US); BO) 17 January 2002 (2002-01-17)
- Document D1 discloses a scheduling device for scheduling data transmission over 2. a plurality of channels in a data network (cf. page 5, lines 23-26) comprising monitoring means for monitoring a predetermined parameter and scheduling means for determining a request for change of the maximum channel capacity allocated to said channel (cf. page 7, lines 21-26; page 23, lines 10-24). The subject-matter of claim 1 differs from D1 in that the parameter that encodes the request for additional bandwidth is an special value of a channel capacity indicator. The problem solved by this feature is indicating a request for capacity within the channel itself. The feature that the parameter is encoded as an special value of the capacity indicator is just a design option that is available to the person skilled in the art without requiring inventive skills. Document D1 shows that the request is put in bandwidth that is not previously used. The special value of the channel capacity indicator that is used in claim 1 is such an unused bandwidth, since its meaning is defined as a request for bandwidth and not a normal capacity indicator. Therefore the subject-matter of claim 1 does not involve an inventive step in the sense of Article 33(3) PCT.

The same reasoning applies to claims 11 and 18.

- 3. The use of a transport format combination to indicate the capacity of the channel is a normal feature of known communication systems. Therefore the subject-matter of claims 4, 16 and 21 does not involve an inventive step in the sense of Article 33(3) PCT.
- 4. The additional features of claims 2, 3, 5-10, 12, 17, 19, 20, 22-25 are well known features of communication systems. Therefore the subject-matter of these claims does not involve an inventive step in the sense of Article 33(3) PCT.
- It is well known in communication systems that requests for resources have to be limited in time, but that they can be repeated. Therefore the subject-matter of claims 13 and 14 does not involve an inventive step in the sense of Article 33(3) PCT.
